SANUSI BELLO OLANIYAN

FRONTEND DEVELOPER

+2348027365891 | rafiubello4real@gmail.com | Lagos, Nigeria

SUMMARY

An experienced software engineer, with over 6 years of working experience developing various enterprisescale solutions. Extremely motivated to constantly develop my skills and grow professionally. I'm passionate about technologies and tools for building scalable and robust enterprise scale applications that solve real-life problems. I love making processes easier, faster and more effective

TECH STACK

Front End	CSS3, Bootstrap, HTML5, JavaScript, React.js, Vue.js, Next.js, SaaS, Tailwind
Back End	Python, Django, JavaScript, Node.js, Express, Selenium, Falsk, C#,.NET, .NET Core, .NET Framework, Microservices, APIs
Data Stores	MySQL, Oracle, PostgreSQL, MongoDB, Cassandra, Redis, SQL Server Access, Firebase
Web Servers	Apache Tomcat, Apache HTTP Server, Nginx, Google Web Server, IBM WebSphere, Microsoft IIS
Operating Systems	Kali Linux, Ubuntu, Chromium OS, Mac OC, Windows, Parrot OS
Cloud Computing	AWS, Azure, Heroku, Google Cloud Platform, Cloudinary

EXPERIENCE

Python Developer(contract) | Bayero University| Kano / Remote   **Jan 2023– Jul 2023**

- Develop, test, and maintain scalable, efficient, and reliable data pipelines and models using Python and various data science libraries and frameworks.
- Implement machine learning algorithms and statistical models to solve business problems and enhance product offerings.
- Evaluate and improve model performance through validation, hyperparameter tuning, and continuous monitoring of performance metrics.
- Create clear and concise documentation, including data dictionaries, process flows, and technical specifications, to ensure data quality and reproducibility of analyses.
- Technologies: Python, Django, MySQL, Mongo, Nginx, Selenium, AWS

Frontend Engineer | Jemboxx™ | Lagos /Hybrid   **2021 – 2023**

- Write clean code to develop functional web applications
- Troubleshoot and debug applications
- Perform UI tests to optimize performance
- Manage cutting-edge technologies to improve legacy applications
- Collaborate with Back-end developers to integrate API endpoints
- Gather and address technical and design requirements
- Build reusable code and libraries for future use
- Technologies: *React js, Typescript, Redux, Material Ui, React Storybook, Javascript*

MERN stack Developer | KhristFix| Ibadan / Remote   **2021 – 2022**

- Frontend development using React Js, HTML5, CSS3
- Backend development using Node Js, MongoDB and Express framework
- Prepare Technical Design and Specification documents
- Collaborate with the development team, support, and business on day to day development requests and support
- Prepare documentation and use case scenarios when required
- Leads solution designs, documents architecture proposals and creates high-level design Documents
- Lead technical solution sessions to ensure that solutions are complete, scalable and are futureproof
- **Technologies**: *Node js, React js, React Query, MongoDB, Cloudinary, Microservice, Docker, Kubernetes*

OTHER EXPERIENCES (Older)

Remote Frontend developer | Foreman Enterprise| Nigeria   2020 - **2021**
Frontend Developer/Designer | Okitech|Nigeria   2017 - **2019**
Computer Analyst | Saawat| Nigeria   2015 - **2018**

EDUCATION

DEGREE | University of Ilorin| Ilorin, Nigeria   **2021**
- *Bachelor of Science - Physics*

CERTIFICATIONS

Certified CSS DEV COURSE | HackerRank
Problem Solving Certificate | HackerRank
Responsive Web Design | Freecodecamp
Frontend Fundamentals | Pirple.com

PUBLICATIONS & AWARDS

NAOSS Web Design Tutor | KASHERE UNIVERSITY, GOMBE STATE   2022
Programmer of the Year - NAPPS - National Association of Physics Student. UNILORIN   2022

PERSONAL & OPEN-SOURCE PROJECTS

- **Mazaryn** - An open-source social application that implements blockchain technology for transactions among members of the application. (React, Python Django, PostgreSQL).
- **Trans-Logistics** - A logistic application that allows users to send and receive goods and parcels across the nation. (React, Node JS and MongoDB).
- **JavaScript-Land-Community** - An open-source application for javaScript that allows users to search for and create video recordings through the world (Next, Node and Mongo)
- **Tube-Pro** – A personal project that grant users access to videos regarding their search terms integrated with YouTube API (React and CSS).
- **Sea-food-store** – An e-commerce website where clients are able to load available sea foods and add it to their cart and it was made editable (React, Firebase and Stylus).
- **Message-Encryption** - A web-based application for encrypting messages into links which can be decrypted only by the person that has the link (JavaScript, CSS and HTML).
- **Movie-Compare**r - A website for comparing two movies in order to know which one more rated, built with HTML, CSS, JavaScript, Axios, bulma, OMDB API and Fontawesome
- **To-do app** - A React JS web application for where users can create new tasks, delete an existing one and ticking the completed ones out. Built with React js, CSS, Axios and UUID.
- **Blog Post** - An online blog platform, built with Node js framework, MongoDB, EJS, lodash, Morgan, FireBase and Express Js.
